

Latest news from Fujirebio

Volume 30 - February 2017

We are pleased to send you the February 2017 edition of our monthly newsletter.

- Fujirebio Europe launches Lumipulse® G β -Amyloid 1-42
- Whitepaper: CSF biomarkers in diagnostic work-up of suspected Alzheimer's disease patients
- Meet us at Medlab 2017 in Dubai, UAE
- Meet us at HPV 2017 Conference in Cape Town, South Africa
- CanAg EIA trouble shooting questions and answers

Do not hesitate to forward this email containing useful product news and background information from Fujirebio to your colleagues or partners. For instructions on how to unsubscribe from this newsletter please follow the link at the end of this newsletter.

PRODUCT LAUNCH

Fujirebio Europe launches Lumipulse® G β -Amyloid 1-42, a fully automated assay aiding in the early diagnosis of neurodegeneration

Fujirebio Europe has announced the release of the Lumipulse G β -Amyloid 1-42 assay for its fully automated LUMIPULSE immunoassay systems. This CE-marked CLEIA (chemiluminescent enzyme immunoassay) kit allows the quantitative measurement of β -amyloid1-42 in human cerebrospinal fluid within just 30 minutes.

Whitepaper about the importance of CSF biomarker testing in the diagnostic work-up of suspected Alzheimer's disease patients

Our new Lumipulse G β -Amyloid 1-42 assay is based upon Fujirebio's well established, pioneering ELISA-based INNOTEST® assay (the first neurodegeneration testing kit launched in 1995) and the know-how of our company in robust and automated CLEIA testing since the first LUMIPULSE instrument was released in 1992. We have collected some of our background knowledge in this whitepaper.
